- Heavy Duty End Links Included
- Includes Greasable Polyurethane Bushings, and Mounts.
- Durable, Gloss Black Powder Coat Finish.

Benefits:

- Allows suspension tuning for optimum track or street performance.
- Bolt-In installation requires no vehicle modifications.
- Lightweight Tubular Design
- Contains all necessary mounting and links.

Now you can fine tune the handling of your 1993-2002 Camaro, Firebird or Trans Am with the new bolt-in Hotchkis Adjustable Rear Sway Bar. Three adjustment settings – 225, 240 and 255 lbs/in can be selected by simply moving the included heavy duty end links into the desired adjustment hole at the end of the 15/16" tubular steel sway bar. The result is maximum adjustability, control and driver feedback with the ability to dial-in the way the car responds to throttle steer and how it reacts to driver input. Mounts, greasable Polyurethane bushings and complete installation instructions are included. These bars are designed, track tested and manufactured in the USA and are finished in a durable gloss black powder coat finish.
